

Commercial Dependency Licence Audit — Nyx AI 1.5.493

Generated: 2026-08-20T22:53:19.777Z.

Scope: exact Windows staged application, complete npm lockfile, native/embedded libraries, build-only packages, and first-use downloads.

Purpose: technical licence evidence, not legal advice or a solicitor's commercial-clearance opinion.

Verdict

- **Commercial-use permission:** every declared or exact tuple-reviewed licence conclusion in all **885** non-root package-lock entries and all **282** packaged inventory rows grants commercial use. No npm dependency is marked non-commercial, SSPL, AGPL, proprietary, unlicensed, or unknown.
- **Reviewed ambiguous metadata:** duck version 0.1.12 declares `BSD` in package metadata; its supplied two-clause licence text is concluded and reported as `BSD-2-Clause` while the declared value remains visible.
- **Redistributed npm notice coverage:** **272** exact ASAR package paths plus 10 explicit runtime/assets rows resolve to **278** unique name/version tuples, with zero missing captured/reviewed licence texts.
- **Conditional components:** Electron's FFmpeg is LGPL-2.1-or-later; build-only sharp/libvips alternatives include LGPL-3.0-or-later; jdtls is EPL-2.0 when downloaded; the canvas native binary contains MPL-2.0 Rust files. All allow commercial use, but their distribution/source/relinking conditions still apply.
- **Electron FFmpeg compliance evidence:** for the exact Electron 41.10.5 build distributed with Nyx AI 1.5.493, NYX LIMITED retains the applicable LGPL notices and hash-verified compliance evidence — exact corresponding-source pins, upstream-published digests, and a verified relinking artifact. `legal/source-offers.json` pins the retained public objects by key, size, and hash; `release:upload` publishes and reads them back before `latest.yml`. The direct route and three-year written offer are in `open-source-compliance.md`.
- **Canvas MPL source and provenance:** `@napi-rs/canvas 0.1.80`'s upstream tag omits its historical Cargo.lock, so the complete non-copyleft Rust crate-version closure retains a disclosed provenance limitation. The MPL-covered set is separately resolved from the SLSA-pinned manifest/build date plus the `cssparser-0.35.0` binary marker; exact Source Code Form for `cssparser 0.35.0`, `cssparser-color 0.3.0`, and `dtoa-short 0.3.5` is pinned in `legal/source-offers.json` and published by the release gate.
- **Nyx AI Free remains personal-use only:** third-party permission for NYX LIMITED to build/distribute components does not override Nyx AI Free's own EULA restriction on an end user's commercial use.

Authoritative licence principles used

- OSI states that open-source software can be used commercially, while copyleft may still control redistribution: <https://opensource.org/faq>.
- Apache-2.0 grants reproduction, sublicensing, distribution, and sale subject to its conditions: <https://www.apache.org/licenses/LICENSE-2.0>.
- LGPL-2.1 section 6 permits linking/distribution under conditions including notices and a source/relinking route: <https://www.gnu.org/licenses/old-licenses/lgpl-2.1.en.html>.
- OFL-1.1 permits fonts to be bundled and sold with software while preserving the font licence and reserved-name rules: <https://openfontlicense.org/open-font-license-official-text/>.
- EPL-2.0 expressly contemplates commercial distribution and carries source/indemnity conditions: <https://www.eclipse.org/legal/epl-2.0/>.
- BlueOak-1.0.0 grants broad use but requires recipients to receive the licence text or link: <https://blueoakcouncil.org/license/1.0.0.html>.

Native canvas closure

The exact npm package is `@napi-rs/canvas 0.1.80`. Its tag pins Skia commit `1fdbea293a53b270e3f5e74c92cc6670d68412ff`, and that build enables or links the following native libraries. The installed Windows PE (26272256 bytes; SHA-256

30646342fc284109aa9542155287d37147c97132d5168cf621f851a9c69e0c99) was also searched for codec/library and Rust source-path markers.

Component	Pinned/build identity	Licence	Commercial-use/condition result
@napi-rs/canvas wrapper/native addon	0.1.80 / dda1b258dac667b4c66b94b bd4d70aa79ea4503a	MIT	Commercial use allowed; retain MIT notice.
Skia	1fdbea293a53b270e3f5e74c 92cc6670d68412ff	BSD-3-Clause	Commercial use allowed; retain BSD notice.
ICU	364118a1d9da24bb5b770ac3 d762ac144d6da5a4	Unicode-3.0	Commercial use allowed; retain Unicode notice.
Expat	8e49998f003d693213b538e f765814c7d21abada	MIT	Commercial use allowed; retain notice.
FreeType	1518bc83d26b434031bd12c7 06ac3c7dab3902fd	FTL OR GPL-2.0-only	Commercial use allowed; use the FreeType Licence option and retain its notice.
HarfBuzz	08b52ae2e44931eef163dbad 71697f911fad323	MIT	Commercial use allowed; retain notice.
Brotli	6d03dfbedda1615c4cba1211f 8d81735575209c8	MIT	Commercial use allowed; retain notice.
Highway	424360251cdcf314cfc528f5 3c872ecd63af0f0	Apache-2.0	Commercial use allowed; preserve licence/NOTICE terms.
JPEG XL / libjxl	a205468bc5d3a353fb15dae2 398a101dff52f2d3	BSD-3-Clause	Commercial use allowed; retain notice.
libjpeg-turbo	e14cbfaa85529d47f9f55b0f1 04a579c1061f9ad	BSD-3-Clause AND IJG AND Zlib	Commercial use allowed; retain all applicable notices.
libpng	ed217e3e601d8e462f7fd1e0 4bed43ac42212429	libpng-2.0	Commercial use allowed; retain PNG Reference Library notice.
libwebp	845d5476a866141ba35ac133 f856fa62f0b7445f	BSD-3-Clause	Commercial use allowed; retain notice.
Wuffs	e3f919ccfe3ef542cfc983a821 46070258fb57f8	Apache-2.0	Commercial use allowed; preserve licence/NOTICE terms.
zlib	646b7f569718921d7d4b5b8e 22572ff6c76f2596	Zlib	Commercial use allowed; retain notice and mark altered source if modified.
libavif + libavif-sys	libavif 1.0.4 / Rust wrappers 0.14.0 and 0.17.0	BSD-2-Clause	Commercial use allowed; retain notice.
libaom	3.11.0 (binary-attested)	Copyright licence: BSD-2- Clause; separate patent terms: Alliance for Open Media Patent License 1.0	Commercial use allowed subject to the separately identified copyright and patent terms.
mimalloc	embedded; exact crate version unavailable	MIT	Commercial use allowed; retain notice.

Component	Pinned/build identity	Licence	Commercial-use/condition result
Rust crate closure in @napi-rs/canvas	partially binary-attested; upstream Cargo.lock unavailable	Licence-family summary (not an exact SPDX expression): MIT, Apache-2.0, BSD, ISC and Unlicense; separately identified MPL-2.0-covered files	Commercial use allowed. Exact MPL Source Code Form is pinned in legal/source-offers.json and published by the release gate; the remaining non-copyleft crate-version closure retains the disclosed provenance limitation.

Binary path strings independently attest these Rust crate versions (other optimized crates may leave no recoverable version string):

Crate	Attested version
aho-corasick	1.1.3
base64-simd	0.8.0
cfb	0.7.3
cssparser	0.35.0
memchr	2.7.5
napi	3.3.0
napi-sys	3.0.0
nom	8.0.0
regex	1.11.2
regex-automata	0.4.10
regex-syntax	0.8.6
smallvec	1.15.1
tokio	1.47.1

The upstream direct Rust manifest additionally names anyhow, cssparser-color, infer, libavif, libavif-sys, num_cpus, rgb, serde, serde_json, thiserror, uuid, and mimalloc-safe. Their reviewed licence families permit commercial use. The exact MPL Source Code Form for cssparser 0.35.0, cssparser-color 0.3.0, and dtoa-short 0.3.5 is pinned in legal/source-offers.json and offered through docs/open-source-compliance.md.

Binary build provenance (verified 2026-07-13)

npm publishes signed SLSA provenance (<https://slsa.dev/provenance/v1>) for @napi-rs/canvas-win32-x64-msvc version 0.1.80: <https://registry.npmjs.org/-/npm/v1/attestations/@napi-rs%2fcanvas-win32-x64-msvc@0.1.80> (wrapper package: <https://registry.npmjs.org/-/npm/v1/attestations/@napi-rs%2fcanvas@0.1.80>). The attestation subject digest (sha512

67c8cfb0ce9d7f957c0751eb087074e7e6c3882c6313d400fffd8ae42887550c4c27e5129aa8ec42243449925e3c7096f295cac96d6e07c596d3b

equals this repository's package-lock.json integrity for that tarball byte-for-byte, so the exact redistributed binary is the one built by builder ID <https://github.com/actions/runner/github-hosted> (GitHub-hosted runner [documentation](#)) from source commit [dda1b258dac667b4c66b94bbd4d70aa79ea4503a](https://github.com/dda1b258dac667b4c66b94bbd4d70aa79ea4503a) via the upstream CI workflow (run <https://github.com/Brooooooklyn/canvas/actions/runs/17693234724/attempt/2>, 2025-09-13T07:00:42Z).

This provenance pins who built what from which commit. It does **not** recover the full Rust crate-version closure: the v0.1.80 tag and that commit contain no Cargo.lock, the upstream .gitignore excludes Cargo.lock repo-wide, the CI workflow neither generates nor uploads one, and the run's build artifacts have expired. A present-day `cargo generate-lockfile` against the tag's Cargo.toml would resolve crates as of today rather than the 2025-09-

13 build date, so it is deliberately not presented as evidence. The binary-attested crate versions above remain the recoverable subset.

First-use and user-selected components

Component	Redistribution status	Commercial-use result
Chrome Headless Shell (from the Chrome for Testing distribution)	Downloaded by the user after revision-bound native consent; not in the Nyx AI installer	Nyx AI requests the exact Chrome Headless Shell revision tested by its installed Puppeteer release rather than a moving channel. The cached engine does not auto-update. Google terms and the downloaded binary's embedded open-source notices apply; it is not licensed merely as BSD-3-Clause. System Chrome or Edge may be used instead when already installed.
pyright 1.1.410	Downloaded on demand; not redistributed	MIT; commercial use allowed with notice conditions.
rust-analyzer 2026-06-01	Downloaded on supported macOS/Linux targets; not redistributed	MIT OR Apache-2.0; commercial use allowed.
Eclipse jdtls 1.61.0-202607102111 (immutable official artifact; 50,952,249 bytes; SHA-256 319b60ef9566a0f33204331b3ad8265551e19684297bb018dc701c5a8c5d398a)	Downloaded on demand; not redistributed	EPL-2.0; commercial use allowed, with EPL conditions if redistributed/modified. The timestamped Eclipse filename and exact hash are pinned in the runtime manifest.
gopls / C# language server	Never auto-downloaded; user PATH only	User's installed component and its licence govern.
create-vite / create-next-app and generated project packages	Downloaded into the user's project on request; not redistributed as Nyx AI	Scaffolder/package licences and the generated project's dependency licences remain the user's project obligations.
AI models/providers	No weights redistributed; user selects a local model or connects their own provider	Terms vary by exact model/provider and can change. MiniMax M3 terms reviewed 2026-07-13 permit commercial use subject to licence conditions; users must check the current terms for the exact model, provider, account and intended use.

Full npm lockfile — every installed dependency path

This table includes runtime candidates, platform alternatives, and build/dev-only packages. Build-only LGPL rows are not evidence that those binaries ship; the staged-ASAR table below is the redistribution authority.

Every row is covered by the commercial-use verdict above; the table keeps only the fields that vary by dependency.

#	Package path	Package	Version	Licence	Role
1	node_modules/@alloc/quick-lru	@alloc/quick-lru	5.2.0	MIT	build/ dev only
2	node_modules/@azu/format-text	@azu/format-text	1.0.2	BSD-3-Clause	build/ dev only

Evidence files

- Exact staged-package inventory: docs/licenses-inventory.json
- Full captured/reviewed package notices: docs/third-party-licenses-full.txt
- CycloneDX distribution SBOM: docs/sbom.cdx.json
- Human runtime/native/download summary: docs/third-party-licenses.md
- Electron/Chromium component credits: LICENSES.chromium.html in the packaged application
- Native notice sources: legal/native-notices/
- Recipient source/relinking offer: docs/open-source-compliance.md and legal/source-offers.json
- Electron FFmpeg corresponding-source evidence (pins, published digests, verified hashes): FFMPEG-LGPL-CORRESPONDING-SOURCE-EVIDENCE.md (repository root; release-gated against the installed Electron version)

Regenerate with `npm run license:commercial-audit` after the staged inventory has been regenerated.
